Dear Home Owner,

As you may be aware, in the Spring of 2016 Muddy Men Construction Corporation was purchased by RSM Construction Group Ltd. We are now operating as Muddy Men Construction-A Division of RSM Construction Group Ltd. We have been working with the previous owners during this transition period and have also employed the previous installers/maintenance technicians. We look forward to serving the existing Muddy Men client base as well as new clients.

Under new ownership we will continue to offer yearly maintenance contracts for the upkeep of your septic system. Your septic system manufacturer may require yearly maintenance to maintain warranty. Additionally, your local municipality may also require proof of a septic maintenance contract. We also offer one time inspections for real estate transactions, re-inspections as mandated by local municipalities and voluntary inspections. Our Inspections include:

- Determining the working condition of all components
- Assessing the need for maintenance, remedial action, or replacement
- Taking a sample of the Septic System's tertiary effluent, when required
- Obtain a laboratory analysis of the Septic System's tertiary effluent, when required
- Making any necessary adjustment of the pump switches, control panel settings and nozzles (if installed)
- Cleaning the effluent filter
- Providing a written report listing:
 - Minor deficiencies and proposed remedial action
 - Major deficiencies and required remedial action
 - Cost estimates for required remedial services
 - Overall system status

Please note our pricing has changed to reflect current industry standards. Please contact us for full pricing details. If you currently have a maintenance contract with Muddy Men under the previous ownership, we will honour the contract pricing until the end of the contract period. However, we will still require you to sign a new contract under the new operating name and address.

In addition to designing, installing and maintaining septic systems we also offer the following services: all types of excavation, demolitions, retaining walls, final grading, driveways, water, sewer and lot clearing!

We value our Muddy Men Construction clients and look forward to working with you in the future. If you have any questions, please feel free to contact us.

Sincerely,

Mike Zollner-Owner

Muddy Men Construction-A Division of RSM Construction Group Ltd.
